

WIRE PAYMENTS

Precision and Security for Every Transfer

Blue Foundry Bank Migration

When it comes to wire transfers, speed and security are everything. BOSS delivers a full-featured wire payment experience—domestic and international—with the controls, templates, and transparency that commercial banking requires.

DOMESTIC

Domestic wires with same-day settlement.

INTERNATIONAL

International wires in foreign currency.

2FA

Dual-approval controls on every wire.

WIRE TRANSFER CAPABILITIES

Domestic Wire Transfers

Send funds to any U.S. financial institution quickly and securely—with same-day settlement options available.

International Wire Transfers

Execute cross-border wires in foreign currencies with beneficiary details managed directly in BOSS.

Repetitive Wire Templates

Set up templates for frequent wire recipients so your team can initiate payments in seconds — not minutes.

Future-Dated Wires

Schedule wires for a future settlement date, giving you precise control over your cash flow and liquidity.

Dual Control Authorization

Require dual approval before any wire is released—a critical security layer for high-value transactions.

Beneficiary Management

Maintain a secure library of wire beneficiaries with all routing, account, and correspondent bank details pre-saved.

Real-Time Wire Status

Receive immediate confirmation and track wire status from initiation through final settlement.

Full Audit & Reporting

Every wire is fully logged—by user, date, amount, and approval—providing a complete record for compliance.

BOSS wire payments combine speed with controls—so your funds move exactly when you need them to, with every safeguard in place.
